

Exhibit A
Marked-Up Version of Amended Claims

14. (Amended) An isolated polynucleotide of at least about 60 nucleotides capable of hybridizing to a polynucleotide of Claims 3 or 10 under high stringency conditions, said conditions comprising incubating at 65°C in 0.5M NaHP0₄, 7% sodium dodecyl sulfate (SDS), 1mM EDTA and washing at 68°C in 0.1xSSC and 0.1% SDS.
